

IWEISS

CHANNEL CURTAIN TRACK Idler Hanging Clamp

The IWEISS Channel Track Idler Hanger is a pair of formed steel plates that bolt together above the top of the track. There is a hole provided above the bolted connection for independent suspension of track or attachment of track to pipe support. Hanger can be mounted anywhere along the track's length without impeding travel and is spaced based on the system's weight requirements. The idler sheave mounted to the side of the hanger is used to support the operating cord over long distances.

TECHNICAL DATA

Part #	IWC06I
Materials	12 ga Zinced Formed Steel with Nylon Bearing Idler
Dimensions	4 5/8" x 8 3/8"
Weight	2lbs
