RIGGING EQUIPMENT

# Gallery Lock Rail

The gallery lock rail is a structural railing that supports the rope locks in a counterweight rigging system and generally mounted on a catwalk above the stage floor. This unit has vertical stanchion members that are intended to be welded to the building structure, with a 1/4" steel formed top member designed for specific line-set centers.

## TECHNICAL DATA

- Part #** WLR-XXG
- Specs**
- 1/4" formed top member
  - Square tube mounted on 4ft centers
  - Expanded mesh closure available
  - Toe kick rail available
  - Engineered for 500lbs per foot up lift
  - Custom center spacing available
